

## CONVERTER GUARD

Catalytic converter theft has become an issue in recent years, necessitating a reliable safeguard. By permanently etching the catalytic converter with a registered number, highlighted by a window decal warning, the presence of Converter Guard becomes easily identifiable and deters thieves from stealing an identifiable vehicle.

If the Converter Guard product fails to prevent the theft of the catalytic converter attached to the vehicle listed in the registration and is stolen within the Term of Coverage from the date of sale, the installation of a replacement catalytic converter assembly and repairs of any damage to the exhaust system caused by the theft will be covered for 3 years and up to \$2,500 (non-cancellable).

- Dealer Cost \$96
